Fine Art Reprints:

Epson Printing Equipment: The high quality of their print heads and the archival nature of their ink sets, has made the *Epson* line of printers an industry standard for large format fine art printing. Epson's Ultrachrome inks have been tested, and it is estimated that they will last at least 75 years, with the same durability as a watercolor painting.

Arches Digital Papers: Arches has been paper of choice for watercolor artists and traditional printmakers for years. RedArt finds their digital paper to be remarkable in its quality and offers it as our primary stock, though there are many other choices, including canvas.
